

Synthetic Adverse Event Report

Synthetic record ID: DEMO-AE-208 | Prepared for a software demo | Fictional dates and identifiers

Patient and report

Patient: Casey Sample. Patient ID: PT-208. MRN: MRN-551204. Report date: 2026-02-04. All people, identifiers, dates, and events in this file are fictional.

Event summary

In this synthetic scenario, the patient reports nausea and a mild headache beginning the day after starting the fictional study medication DemoDrug 25 mg.

Severity and outcome

The event is described as mild. The fictional report states that no emergency care was needed and symptoms resolved within 24 hours after the study medication was held.

Follow-up

The investigator plans a follow-up call in seven days and will document whether symptoms recur. This invented case exists only to demonstrate extraction and semantic search.
